

EC GROW

Broadleaf Weed Control

Award Turf Fertilizer with Viper is a premium grade herbicide which controls a wide spectrum of broadleaf weeds while providing fast and long-feeding action. Viper contains a stable mix of four herbicides and can be used on Ornamental Turf lawns (residential, industrial, institutional), Parks, Cemeteries, Athletic Fields and Golf Courses.

The active ingredients in Viper need to be absorbed by susceptible plants in order to be effective. Avoid mowing 1-2 days before application. Apply when weeds are actively growing and when the grass is moist (after a rain or morning dew). Do not apply if rain is expected within two days or application site contains Dichondra or Carpetgrass.

Our Award Turf Fertilizer with Viper products:

18-0-3 25% PCSCU With Viper

Always refer to the actual product label for complete instructions and Directions of Use.
Viper is a trademark of Nufarm Limited

Key Benefits
